

Resources on Processing Speed for Parents

Helping kids with slow processing requires that we identify these concerns at home and in the classroom. Dr. Kulman conducts comprehensive neuropsychological evaluations that closely examines the basis for slow processing. We also provide many insights and strategies to address processing speed concerns. Our ongoing series on slow processing speed in children has been acclaimed by many parents and educators. We are pleased that our readers are finding the information valuable for their kids and students. We have many new topics related to slow processing speed that we will be addressing in future articles.

Our team of neuropsychologists, school psychologists, and psychology students at South County Child and Family Consultants is committed to searching the Internet and beyond to find reputable, informative, and practical tools to help parents, children, and teens improve the skill you are writing about – you may want to change the wording to fit your topic here We look for the best information online to help kids diagnosed with ADHD, Learning Disabilities, Executive Functioning Difficulties, struggles with Social Emotional Learning (SEL) skills, Autism, Depression, and Anxiety and provide you with information about how neuropsychological evaluations help in targeting concerns (about the skill you are writing about) you may want to change the wording to fit your topic here Come back regularly, as the links are updated frequently.

Articles
